

WEB APPLIANCE

PRODUCT DATASHEET

The web filter appliance is built for high-demand, high-speed network environments. Schools, libraries and businesses can take advantage of the simplicity and efficiency of the filtering without leaving their network. Install the appliance desktop ("cube") or rack-mount server into your network and we do the rest. The blocked site database updates are automatically downloaded from our master servers on a nightly basis.

Our powerful web filter appliance is easy to setup, affordable, and among the most effective Spam fighters on the market.

Features

- Complete support for 33 categories of filtering
- Internal proxy authentication supporting unlimited number of users and filtering profiles
- Build your own "custom" categories of blocks and allows for complete flexibility
- Filtering profiles can be customized based on login or IP address and/or IP range
- Administrators can bypass the filter using authentication
- Easy to use web-based administration console
- View logs right from the web, or download them as flat text
- Caching feature reduces bandwidth usage
- Support for remote updates and diagnostics
- Email notifications to administrator
- Blacklist websites
- Whitelist websites
- Custom block or allow lists easily controlled by administrator
- Installation in less than 15 minutes
- Depending on network utilization, one component can support up to 10,000 users

Support

Included in your yearly subscription rate is unlimited database updates performed automatically nightly as well as unlimited telephone technical support. Installation includes all necessary on site support needed to configure the equipment to perform designated tasks. Training will be provided for one administrator.

Filter Categories

Hate Speech: Sites dedicated to speech that incites hatred against any group or person (distinguished by race, color, ancestry, place of origin, religion, marital status, family status, physical or mental disability, sex, sexual orientation or age of that person or group of persons) where such incitement may lead to social, emotional and/or physical harm.

Mature Sexual Language: Mature refers to information or text intended for adults; specifically, discussions involving sexual material or descriptions of sexual activity.

Partial Nudity-Lingerie: Sites displaying partial frontal and rear nudity, including beach wear and intimate apparel.

Pornography: Sites that depict sexually erotic behavior in text or graphic images which are pornographic in nature.

Profanity: Language that is considered crude or obscene (including obscene gestures), vulgarity or swearing.

Sexuality: Recognition of or emphasis upon mature sexual matters, including: sex education, gender/transgender studies and gay-lesbian sexuality, sexual advice, sexology, sexual addictions, etc.

Activism and Issues: Sites promoting the doctrine or practice of vigorous action or involvement as a means of achieving political or other goals as by demonstrations, protests, etc., specifically sites that promote change in public policy or opinion, social practice or economic activities.

Alcohol and Tobacco: Sites promoting the use of intoxicating liquor such as whiskey, beer, gin, vodka, etc. or promoting products using tobacco for smoking, chewing or snuff.

Body Art-Tattoos-Piercing: Sites promoting body art such as tattoos or piercing of the body (For ex. piercing of the ear, eyebrows, lip, cheek, bellybuttons, nipples, nose, tongue or genitals)

Computer Hacking: Computer Hacking is the act of unauthorized hacking to a computer, either for fun, malicious or fraudulent purposes. These sites teach and promote such activities.

Death Suicide: Narrations or depictions of the act of dying or death, including autopsies, genocide and the intentional taking of one's own life (suicide).

Gambling: Information that advocates teaches or directs an individual to gambling; including casinos, online gambling or any game of chance for money or other stakes.

Illegal Activities: Activities contrary to or forbidden by official laws or regulations; specifically criminal instruction, illegal drugs or illegal activities.

Reproductive Health: Sites that host information concerned with or pertaining to reproductive health, including: human sexual reproduction, male and female sexual health issues, sexually transmitted diseases etc.

Filter Categories

Violence: Sites promoting rough or injurious physical force, action or treatment; specifically, written descriptions of extreme or excessive violence or grave injury. Also sites devoted to horror or grotesque material.

Dating Service/Personals: These sites are geared toward dating to promote interpersonal relationships via dating personals, escort services and mail order bribes.

Games: The sites that allow the downloading of games or sites that host advice, tips or cracks for computer and video games. Also included are sites exhibiting game magazines.

Humor: Sites that present humor in text and/or graphic forms and include jokes, anecdotes, satire, sitcoms, etc.

Main Shareware Sites: Main sites that host the downloading of shareware. Most shareware is delivered free of charge, but the author usually requests that you pay a small fee if you like the program and use it regularly.

News and Media: Sites that host the entire gamut of news based media, including online newspapers, headline news, newswires and weather information.

Non English Language Web Sites: These web sites use primarily a language other than English.

Online Games: Sites hosting games online. The content of games can vary from young to adult and many online game sites provide a means of communication between gamers such as instant messaging or chat.

Pay to Surf: There are companies around the world that will pay you money to receive advertising, send you email, or otherwise contact individuals, businesses or groups while you surf the internet.

Personal Web Pages/Unpredictable Sites: Some web sites offer, for pay or free, space available to individuals who may or may not express points of view related to lifestyles, ideology issues, etc. Sites hosting personal web pages are very unpredictable. This characteristic also includes other sites that are of unpredictable nature.

Search Engines: A search engine is a web site that searches the internet for specified keywords that you type in the search window and returns a list of the documents where the keywords are found. Google, Alta Vista, Yahoo, Lycos and Excite are samples of search engines.

Streaming Media: Sites that host and/or video streaming media files (For ex. Mp3, mpeg, music or videos) that use a technique for transferring live or archived data processed as a steady or continuous stream.

Weapons: Sites promoting the use of guns and knives, including air guns, ammunitions, collectibles, engravings, competition shooting, range facilities, organizations and clubs and retailers.

Web Based Chat: Internet chat related sites include chat rooms, discussions and home pages. Chat refers to real time communication between users via their computers through text or voice formats.

Web Based Email: Sites hosting typically free Internet based email such as Hotmail and Yahoo. Web based Email requires only minimal information to create an Email account to send Email text, pictures and graphics to others over the internet. Web based Email is also more likely to receive unsolicited email. This characteristic includes sites that allow users to sign up for email lists.
